-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

GERALDINA VISCONTI
PRIMARY EXAMINER

This office action is responsive to the Request for Continued Examination filed 19 July 2007 in conjunction with the Information Disclosure Statement filed therewith.

Claims 1-37 are pending and presently under consideration herein.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-37 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of copending application no. 10/804,303 by Tsuda et al. (corresponding to U.S. Patent Application Publication No. 2004/0191428).

Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to a liquid crystal panel and

corresponding method of manufacturing thereof, wherein said liquid crystal panel has a liquid crystal layer sandwiched between a pair of substrate, characterized in that said liquid crystal layer comprises a liquid crystal and a cross-linked resin, further characterized in that said cross-linked resin comprises a structural part and a terminal part, wherein said liquid crystal layer is formed by cross-linking, in the presence of a liquid crystal, a resin composition comprising one or more first compounds having a cross-linkable structural part, and a hydrophobic terminal part with a straight-chain section having three or more carbon atoms (hydrophobic, long-chain terminal part), and further wherein the cross-linkable structural part of said first compound or compounds comprises a polar-group structural part.

Terminal Disclaimer

3. The terminal disclaimer filed on 10 October 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 10/803,303 has been reviewed and is *NOT* accepted.
4. The application/patent being disclaimed has been improperly identified since the number used to identify the copending application being disclaimed is incorrect. The correct number is 10/804,303.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geraldina Visconti whose telephone number is (571) 272-1334. The examiner can normally be reached 8:00am to 4:30pm.
